

# SERVICES COMMITTEE

In 2025, the Union advanced its commitment to building a stable, supportive, and opportunity-rich environment for students by strengthening the core systems that underpin academic success, financial well-being, and community engagement. Our focus remained on long-term impact ensuring that every initiative contributed to a stronger institutional foundation.

A central priority was enhancing affordability. Key services including the Health and Dental Plan, UPASS, Locker Rentals continued to reduce day-to-day financial pressures for students. These efforts enabled students to redirect their energy toward their studies and personal well-being. Complementary food-security initiatives such as the Chef's Package, Community Meals, and the Emergency Food Security Program provided targeted support to students facing immediate needs while reinforcing a culture of care and connection across campus.

In the area of educational and professional services, changes to the Grants Program elevated both the quality and impact of student-led initiatives. The Conference Grants Program enabled students to access high-value learning and networking opportunities beyond the classroom, while the General and Educational Event Grants empowered student leaders to deliver inclusive events that enrich campus life and advance their leadership capacity.

The Union also invested in organizational capacity building through curated Club Gatherings designed to strengthen leadership skills, operational knowledge, and collaboration among student groups. These sessions contributed to a more resilient and well-supported club ecosystem, positioning student leaders to deliver meaningful programming and engagement opportunities.

Overall, 2025 represented a year of strengthening institutional foundations. Through strategic investments in affordability, academic enrichment, and community-building, the Union ensured that students had the resources, stability, and opportunities necessary to thrive academically, socially, and personally.
